4 EFFECTS | FREE RESOLVE | FONTS INCLUDED

BUNDLE

TITLE BUNDLE VOL. 2

ANUKALP.WIP

Four text effects in one install: Scramble, Scribble, Video in Text and Morph. Each has its font in its own folder, and Scramble and Morph come with sound effects.

WHAT'S IN THE DOWNLOAD

- One `.drfx` at the top that installs all four effects.
- One folder per effect with its font and licence.
- Sound effects in the Scramble and Morph folders.
- Stack two copies in one node chain and each keeps its own settings.

TITLE | FREE RESOLVE | 31 CONTROLS

SCRAMBLE

MADE BY

ANUKALP.WIP

Random characters cycle and lock into your text, one letter at a time.

LOCK, SETTLED, BINARY, CAMERA PULL, CUSTOM COLOUR

THE SAME TITLE ON A 16:9 TIMELINE

WHAT IT IS

Type your text and the letters start as random characters. They lock into the real words in the order you pick, with a soft glow. It can unscramble again at the end, or loop.

USE IT FOR

- Hooks and reveals
- Tech, code and hacker looks
- Numbers and data callouts
- Lower thirds with some energy

HOW TO INSTALL

01 **Double-click** the `.drfx` at the top of the download. All four effects install at once.

02 Install the font from this effect's folder: double-click `BebasNeue-Regular.ttf`, then Install.

03 **Restart** DaVinci Resolve.

04 Edit page → Effects → **Titles** → anukalp.wip.

Windows has not been tested.

Works in the free version of Resolve (tested on Resolve 21.1 on Mac).

CONTROLS

INSPECTOR → TITLE → CONTROLS · DEFAULT · WHAT IT DOES

TEXT

Text		Your words.
Font		Any font installed on your computer.
Style		The font's weight or style.
Size		How big the text is.
Tracking		Space between letters.
Text Colour	`colour picker`	The text colour.

SCRAMBLE

Random Characters	`Letters + Numbers`	The set of characters used while scrambling.
Lock Order	`Left to Right`	Which letters lock first.
Change Every (frames)	`2`	How often the random characters change. 1 is fastest.
Random Seed	`1`	A different mix of random characters.

GLOW

Glow Amount	`0.9`	Strength of the glow. 0 is off.
Glow Size	`16`	How far the glow spreads.

LAYOUT

Position		Where the text sits.
Rotation		Tilts the text.
Start Zoom (camera pull)	`1`	Starts zoomed in and pulls back as the letters lock. 1 is off.
Start Tilt	`0`	Starts tilted and straightens during the pull.

CONTROLS (CONT.)

INSPECTOR → TITLE → CONTROLS · DEFAULT · WHAT IT DOES

ANIMATION IN

Play	Once	Once, or Loop through lock, hold, unscramble and repeat.
Lock Duration (frames)	36	How long all the letters take to lock.
Start Delay (frames)	0	Waits this long before the animation starts.
Before It Starts	Show Scrambled	What shows during the Start Delay.
Ease	Linear	How the move speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.
Hold Locked (frames)	36	Loop: how long the real text stays.
Unscramble Duration (frames)	18	Loop: how long it takes to scramble again.
Stay Scrambled (frames)	12	Loop: the pause before locking again.

ANIMATION OUT

Out Style	Scramble Out	How it leaves at the end of the clip.
Out Duration (frames)	18	How long the exit takes.
End Before Clip End (frames)	0	Finishes the exit this many frames before the clip ends.
Unscramble Order	Reverse of Lock	Which letters break apart first on the way out.
Ease	Smooth	How the move speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.

TIPS

PRO TIPS

- Change Every 1 = frantic, 3 or 4 = calmer.
- From Centre and From Edges look great on short words.
- Binary with a green colour gives a quick terminal look.
- The sounds are in the Scramble folder. Put the In sound at the start of the title and its lock lands on the default 36-frame duration.
- Change Lock Duration and you can slide the sound to match.

MAKING A VIDEO ABOUT IT

HOOK IDEA

“Make any line decode itself on screen.”

TALKING POINTS

- Type your text
- Change the Lock Order
- Try Loop

TITLE | FREE RESOLVE | 23 CONTROLS

SCRIBBLE

MADE BY

ANUKALP.WIP

Pencil scratches draw your text on, then it keeps wobbling like stop-motion.

SCRATCHES, THIN STAGE, FULL WEIGHT, SCRATCH ONLY, CUSTOM COLOUR

THE SAME TITLE ON A 16:9 TIMELINE

WHAT IT IS

Vertical pencil scratches reveal the letters, they thicken to full weight, and the outline keeps boiling like hand-drawn animation. It scribbles itself off at the end.

USE IT FOR

- Captions with a hand-made feel
- Vlogs and storytime edits
- Playful titles
- Notes and callouts

HOW TO INSTALL

01 **Double-click** the `.drfx` at the top of the download. All four effects install at once.

02 Install the font from this effect's folder: double-click `PatrickHand-Regular.ttf`, then Install.

03 **Restart** DaVinci Resolve.

04 Edit page → Effects → **Titles** → anukalp.wip.

Windows has not been tested.

Works in the free version of Resolve (tested on Resolve 21.1 on Mac).

CONTROLS

INSPECTOR → TITLE → CONTROLS · DEFAULT · WHAT IT DOES

TEXT

Text		Your words.
Font		Any font installed on your computer.
Style		The font's weight or style.
Size		How big the text is.
Tracking		Space between letters.
Text Colour	`colour picker`	The text colour.
Thickness	`0.06`	Weight of the letters.

SCRIBBLE

Scribble (wobble)	`0.8`	How much the letters wobble. 0 is off.
Wobbles per Second	`12`	How often the wobble changes.
Wobble Size	`0.5`	Bigger means rounder, looser wobbles.

LAYOUT

Position		Where the text sits.
Rotation		Tilts the text.

CONTROLS (CONT.)

INSPECTOR → TITLE → CONTROLS · DEFAULT · WHAT IT DOES

ANIMATION

Draw Style	Scratch + Thicken	How the text draws on.
Scratch Density	1	How fine the pencil scratches are.
Erode In (draw on)	On	Draws the text on at the start.
In Duration (frames)	14	How long the entrance takes.
Start Delay (frames)	0	Waits this long before the animation starts.
In Ease	Linear	How the draw-on speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.
Erode Out (scribble off)	On	Scribbles the text off at the end.
Out Duration (frames)	12	How long the exit takes.
End Before Clip End (frames)	0	Finishes the exit this many frames before the clip ends.
Out Ease	Smooth	How the exit speeds up and slows down. Pick Custom to draw your own.

PRO TIPS

- Wobbles per Second 8 to 12 feels like real stop-motion.
- Try other handwriting fonts; Thickness makes thin ones bold.
- Thicken Only is the cleanest draw-on. Scratch Only is the roughest.

MAKING A VIDEO ABOUT IT

HOOK IDEA

“Hand-drawn text in one drag.”

TALKING POINTS

- Drop it on
- Change Thickness and Scribble
- Try the Draw Styles

EFFECT | FREE RESOLVE | 30 CONTROLS

VIDEO IN TEXT

MADE BY ANUKALP.WIP

Your clip plays only inside the letters, on a colour card or a solid background.

CARD, SOLID COLOUR, POP, ZOOM THROUGH, YOUR OWN WORD

THE SAME EFFECT ON A 16:9 TIMELINE

WHAT IT IS

Drop it on a clip and the video shows only through your word. Use a colour card or a solid background, reframe the video inside the letters, and animate in with Pop or Zoom Out or out with Zoom Through.

USE IT FOR

- Travel and place names
- Chapter titles
- Openers that dive into the footage
- Thumbnails

HOW TO INSTALL

01 **Double-click** the `.drfx` at the top of the download. All four effects install at once.

02 Install the font from this effect's folder: double-click `Anton-Regular.ttf`, then Install.

03 **Restart** DaVinci Resolve.

04 Edit page → Effects → **Effects** → anukalp.wip.

Windows has not been tested.

Works in the free version of Resolve (tested on Resolve 21.1 on Mac).

CONTROLS

INSPECTOR → EFFECTS → WIP VIDEO IN TEXT · DEFAULT · WHAT IT DOES

TEXT

Text		Your words.
Font		Any font installed on your computer.
Style		The font's weight or style.
Text Size	1	How big the word is.
Tracking		Space between letters.
Line Spacing		Space between lines.

LOOK

Look	Colour Card	A colour card behind the word, or a solid background.
Background Colour	colour picker	The colour around the word.
Background Opacity	1	Below 1, your clip shows faintly around the word.
Card Colour	colour picker	The card's colour.
Card Padding Sides	0.03	Card space left and right of the word.
Card Padding Top/Bottom	0	Card space above and below. Negative tightens it.

VIDEO INSIDE

Video Zoom	1	Zooms the video inside the letters.
Video Position		Moves the video inside the letters.
Slow Push-In (over the clip)	0	Slowly zooms the video across the clip.

LAYOUT

Text Position		Where the word sits.
Rotation	0	Tilts the text.

CONTROLS (CONT.)

INSPECTOR → EFFECTS → WIP VIDEO IN TEXT · DEFAULT · WHAT IT DOES

ANIMATION IN

In Style	None	How it arrives.
In Duration (frames)	18	How long the entrance takes.
Start Delay (frames)	0	Waits this long before the animation starts.
Pop Start Size	0.15	How small the word starts for Pop.
Ease	Smooth	How the move speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.

ANIMATION OUT

Out Style	None	How it leaves at the end of the clip.
Out Duration (frames)	18	How long the exit takes.
End Before Clip End (frames)	0	Finishes the exit this many frames before the clip ends.
Ease	Smooth	How the move speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.
Zoom Into (letter)		Moves the zoom toward one letter.
Zoom Depth	40	How far the zoom travels.

TIPS

PRO TIPS

- Heavy fonts work best: more letter means more video.
- Short words fill the frame better.
- Zoom Through dives into the word. Zoom Into moves the dive toward one letter.
- Background Opacity under 1 lets the clip show faintly around the word.

MAKING A VIDEO ABOUT IT

HOOK IDEA

“Put your whole video inside a word.”

TALKING POINTS

- Drop it on a clip
- Change the Look
- Zoom Through

EFFECT | FREE RESOLVE | 36 CONTROLS

MORPH

MADE BY

ANUKALP.WIP

A huge word behind the person, its outline on top of them, and every letter springs up.

SPRINGING LETTERS, SETTLED, THICK OUTLINE, NO SMALL WORDS, YOUR OWN WORD

THE SAME EFFECT ON A 16:9 TIMELINE

WHAT IT IS

The word sits behind your subject, the subject stays in front, and wherever they cross the word its outline is drawn over them. It follows them as they move. Letters spring up one after another, with optional small words above and below.

USE IT FOR

- Talking-head hooks
- Intro titles over a person
- Fashion and portrait edits
- Thumbnails with depth

HOW TO INSTALL

01 **Double-click** the `.drfx` at the top of the download. All four effects install at once.

02 Install the font from this effect's folder: double-click `Montserrat-ExtraBold.otf` and `Montserrat-Light.otf`, then Install.

03 **Restart** DaVinci Resolve.

04 Edit page → Effects → **Effects** → anukalp.wip.

Windows has not been tested.

Works in the free version of Resolve (tested on Resolve 21.1 on Mac).

CONTROLS

INSPECTOR → EFFECTS → WIP MORPH · DEFAULT · WHAT IT DOES

BIG WORD

Text		Your words.
Font		Any font installed on your computer.
Style		The font's weight or style.
Size		How big the text is.
Tracking		Space between letters.
Colour	colour picker	The word's colour.

OUTLINE OVER PERSON

Show Outline Over Person	On	Draws the word's outline over the person.
Outline Thickness	0.0025	How thick the outline is.
Same Colour as Word	On	Off lets you pick another outline colour.
Outline Colour	colour picker	The outline's colour.

SMALL WORDS

Show Small Words	On	Small words above and below the big word.
Top Words		Spread evenly across the top line.
Bottom Words		Spread evenly across the bottom line.
Small Font		Font of the small words.
Small Style		Weight of the small words.
Small Size	0.045	How big the small words are.
Small Colour	colour picker	Their colour.
Spread (left / right)	0.4	How wide the small words spread.
Gap (above / below)	0.105	How far they sit from the big word.
Appear After (frames)	0	When the top line starts fading in.
Bottom Line After (frames)	6	How long after the top line the bottom line appears.
Fade In (frames)	6	How long each line takes to fade in.

CONTROLS (CONT.)

INSPECTOR → EFFECTS → WIP MORPH · DEFAULT · WHAT IT DOES

LAYOUT

Position		Where the text sits.
Rotation	0	Tilts the text.

ANIMATION IN

Letter Duration (frames)	14	How long each letter takes to spring up.
Stagger (frames/letter)	1	The gap between one letter and the next.
Start Delay (frames)	0	Waits this long before the animation starts.
Ease	Elastic	How the move speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.
Spring Amount	1	How much the letters overshoot.

ANIMATION OUT

Out Style	Fade	How it leaves at the end of the clip.
Out Duration (frames)	8	How long the exit takes.
End Before Clip End (frames)	0	Finishes the exit this many frames before the clip ends.
Slide Direction	Up	Which way the word slides out.
Ease	Smooth	How the move speeds up and slows down. Pick Custom to draw your own.
Ease Graph		Shown when the ease is Custom. Drag the curve to shape the motion.

TIPS

PRO TIPS

- It needs a cut-out. On a normal clip the person layer covers the frame and only the outline shows.
- Place the word at head height so the outline crosses the hair and face.
- Spring Amount 0 removes the overshoot, 2 or more makes it rubbery.
- The spring sound is in the Morph folder. Put it where the title starts.

MAKING A VIDEO ABOUT IT

HOOK IDEA

“Text behind you, outline on top of you.”

TALKING POINTS

- Cut out the person
- Drop Morph on the cut-out
- Move the word to head height
